Professional Summary

Web-focused Developer specialising in JavaScript, TypeScript, React, and Next.js to build and maintain data-driven web applications. Experienced in end-to-end web development, REST API integration, and basic database-backed features, with projects that include user authentication, dashboards, and real-time interactions. Strong foundation in modern HTML/CSS and web programming, with exposure to AI-powered features and supporting web tooling; ready to extend these skills into CMS-based (WordPress/Joomla), LMS, and CRM maintenance in an educational context.

Skills

- **Frontend**: JavaScript, TypeScript, React, Next.js, Tailwind CSS
- **Backend**: Node.js, Express, REST APIs, OpenAI API, Google AI Studio
- **Databases**: MongoDB, PostgreSQL (vector data for RAG systems)
- **Tools**: Docker, Git, GitHub, Vercel, Linux, Render

Experience

Umuzi - Software Developer Intern

January 2026 - Present

- Designed and deployed internal tools adopted by ~47% of the organisation, streamlining workflows and reducing manual effort
- Built a semantic knowledge retrieval system enabling natural language queries across internal documentation, significantly reducing search time
- Developed scalable systems using efficient data models, indexing, and performance optimisations; recognised by leadership for delivering impactful productivity improvements

Projects

AI Dev Project Picker

Live: devprojectpicker.vercel.app

Stack: Next.js, OpenAI, Github REST API

- Developed a Next.js web application that reads job descriptions and GitHub data to recommend best-fit portfolio projects, showcasing strong JavaScript/TypeScript and web programming skills.
- Integrated multiple external APIs (GitHub REST and OpenAI) and implemented robust error handling, aligning with the role's focus on API integration and troubleshooting web-related issues.
- Implemented responsive UI with Tailwind CSS and modern React patterns, ensuring cross-browser friendly layouts suitable for business-facing web platforms.

GitHub Wrapped

Live: wrapped.samson.codes/

Stack: Next.js, TailwindCSS, OpenAI, MongoDB

- Built a GitHub activity 'year in review' platform using Next.js, React, and TypeScript, covering both frontend UI and backend logic for computing and serving analytics.
- Implemented MongoDB persistence and Mongoose models to manage user stats, demonstrating practical web database management aligned with the role's MySQL/database expectations.
- Integrated the OpenAI API with secure configuration and fallbacks, mirroring the job's requirement for reliable third-party web services and REST integrations.

Education

Umuzi - Advanced Web Development(Experience Lab)

APR 2025 - DEC 2025

IBM Skills Build - Full Stack JavaScript Developer

SEP 2025

Credential ID: JVODCFT76FOB

Phakamani Secondary School - Matric NSC

JAN 2021 - NOV 2021
